

Women's Health Clinic

The Lyndhurst Health Department offers their Women's Health Clinic twice each year. Women 18 years of age and older can obtain a free breast and gynecological exam, including a pap smear. Participants are provided with the opportunity to work with a health educator from Clara Maass Medical Center. The educator teaches the correct method of breast self-examination, a technique which should be practiced monthly by women in order to detect cancer early for a better prognosis. Appointments required. Please call 201-804-2500 to schedule an appointment.
